

Label-Aire Label Applicators & Printer/Applicators

The Label-Aire heavy duty series of applicators and label printer/applicators are extremely rugged units designed to address applications requiring precise label placement accuracy (+/-1/32") at medium to extremely high production speeds. Label-Aire is known the world over for consistency and integrity.

SCPE Applicators & Printer/Applicators

From table top semi-automatic wrap and tamp units to fully automatic custom systems, So. California Packaging Equipment is one fo the industry's most dynamic, rapidly growing companies.

Sato / Zebra / Datamax / Tharo Printers

All our represented printers set new benchmarks in price / performance label throughput. From low cost, low volume models to heavy duty 24/7 operation thermal transfer printing even when printing from standard Windows applications. Ancillary equipment, such as large roll rewinder/slitters are also available

Easylabel Label Printing Software

Best Label has supplied literally thousands of these powerful, yet easy to use label design and production software programs. Your labels can include text, graphics, lines, boxes and barcodes, all from within Windows on any PC.

Sony Thermal Transfer Ribbon

Every Sony Thermal Transfer Ribbon product has been uniquely engineered to meet the requirements of a wide range of applications and tested for optimum performance with all types of paper and film print media and printer models.
